Meditel 2004

Dear Sir / Madam,

We are organizing an important conference on Medical Informatics in Bangalore. The conference aims to enhance the awareness of Information Technology (IT) and its importance for the Healthcare Industry. For long, both these sectors have attracted the best of human talent. Now the time is ripe to forge a strong alliance between these sectors thereby ensuring their mutual advancement to higher levels.

We hope to garner participation from diverse constituents like doctors, hospital administrators, medical institutions, IT software companies, IT hardware companies and insurance companies.

Service industries have grown in importance in India. However, this promises to be the decade of Healthcare and IT wherein both these streams have the ability to take our country forward. It is through the notion of 'teamwork' that our efforts together can make India a competitive force in the global scene.

This is your opportunity to become conversant with every aspect of IT as applicable to healthcare today and its development in future.

We eagerly look forward to your participation.

Sincerely,

Dr. M. G. Bhat
Organising Chairman

Dr. Sunil Shroff
President MCSI
